1. The following is an examiner's statement of reasons for allowance:

The applicant claims a fusing device comprising a pressure roller and a heating roller wherein the heating roller comprises a heating pipe sealed at both ends, a cylindrical roller surrounding the heat pipe, a heating element disposed between the heat pipe and cylindrical roller, a mechanical unit which imparts mechanical force to the heat pipe, and a working fluid contained within the sealed heat pipe, such that the working fluid is supercooled at room temperature and which crystalizes and produces heat when the mechanical unit imparts mechanical force to the heat pipe which is not disclosed or rendered obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lee et al. '080, Lee '896, Lee '917, Lee '515, and Sawamura et al. teach a fusing roller having a working fluid within the interior of a heat pipe. Matsuo et al., Kuroda et al., Matsuo (JP '290), Matsuo (JP '340), and Matsuo (JP '686) teach a
